

SUMMARY

Final-semester B.Tech Computer Science student and .NET Full Stack Developer with 3 years of professional experience, including 2 years full-time and 1 year of freelance expertise. High proficiency in .NET 8, ASP.NET Core, and Angular, with a proven track record of migrating legacy systems and architecting RESTful APIs using Clean Architecture. Seeking to leverage expertise in C# and SQL Server to drive technical excellence in a product-based environment.

WORK EXPERIENCE

Freelance / Contract Full Stack Developer (Part-Time)

Jan 2025 - Present

- Architected a scalable e-commerce platform using React.js, Redux, and REST APIs, delivering a responsive, cross-device user experience with consistent UI/UX behavior.
- Engineered modular, reusable UI components and optimized API integration layers to improve maintainability, performance, and future feature extensibility.
- Collaborated with stakeholders to translate business requirements into production-ready full-stack solutions, following industry best practices in security, performance, and code quality.

Junior .NET Developer

Feb 2024 - Jan 2025

Hats Off Solutions, Gandhinagar

- Led the modernization of legacy applications by migrating from .NET Framework to .NET 8, achieving measurable gains in application performance, startup time, and long-term maintainability.
- Architected secure, high-performance RESTful APIs using Clean Architecture principles, custom middleware, and robust authentication/authorization pipelines.
- Developed and integrated full-stack features using Angular and C#, ensuring seamless frontend-backend communication and scalable service orchestration.

Junior .NET Developer

Feb 2023 - Jan 2024

Future Stack Solutions, Ahmedabad

- Designed and delivered enterprise-grade CRM modules using ASP.NET Core, Entity Framework, and SQL Server, optimizing query execution paths and improving data retrieval performance.
- Integrated third-party APIs and automated Excel-based data pipelines, significantly enhancing workflow efficiency and reducing manual user operations.
- Applied Dependency Injection, layered architecture, and configuration management best practices to build scalable, maintainable, and testable backend systems.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Pandit Deendayal Energy University, Gandhinagar

- Relevant Courses: Data Structures, Advanced Web Development, Machine Learning, Software Engineering, Agile Methodologies
- Final Semester (8th Sem) | Expected Graduation: 2026

SKILLS

- Backend Development:** C#, .NET 8, ASP.NET Core, Web API, Entity Framework Core, LINQ, RESTful APIs, Clean Architecture.
- Frontend Development:** Angular, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap.
- Database & Storage:** SQL Server, T-SQL, Database Design, Query Optimization, Code First & Database First.
- Tools & Methodologies:** Git, GitHub, Postman, Visual Studio, VS Code, Agile Methodologies, Scrum, SDLC.
- Additional Competencies:** Data Structures, Machine Learning, Software Engineering, Unit Testing.
